

Forth Ports Limited

Ruling Depths & Under Keel Clearances - Forth

Vessels are scheduled into / out of ports on the Forth & Tay in accordance with the under keel clearance criteria specified in this section of the Marine Guidelines & Port Information.

Vessel operators who require increased under keel clearance margins, over and above those published in the Marine Guidelines & Port Information must ensure that these requirements are specified to FTNS at the time of booking the vessel's arrival / departure. This is to ensure that vessels are booked for the correct height of tide, and to ensure that delays / impacts to the shipping schedule are avoided.

Agents are advised to ascertain vessel specific under keel clear requirements prior to making arrival / departure bookings through FTNS.

LIST OF AMENDMENTS

January 2018	Significant layout changes as well as changes to published depths shown in red
May 2018	Updates to published depths in Leith following recent surveys. Kirkcaldy depths returned to normal following dredge.
June 2018	Hound Point RD 18.6m following survey and review of Grange / Carron dock following first multi beam survey
July 2018	Update to Container Berth depths following Plough dredge.
July 2018	Berth dimensions for all berths in Leith added, changes to some ruling depths in Leith & Rosyth
November 2018	Methil depths updates (all depths now in relation to chart datum)
January 2019	Rosyth ruling depths updated and removal of reference to floating fenders on T Berth
February 2019	Burntisland Key Information Grangemouth J3 & LPG berth depths updated.
May 2019	Leith approach channel remarks & ruling depths within the port Burntisland key information and ruling depths North Imperial cut depth Grangemouth J3 & LPG berths. Methil approach. Rosyth approach
July 2019	Change of UKC for Imperial dock Leith Grangemouth LPG berth Grangemouth Grange Dock- North Grange, North & South Tongue
October 2019	New layout to include the reference chart name and date of the survey Crane pad location added to Rosyth Key information Rosyth ruling depths updated
January 2020	Rosyth ruling depths updated
March 2020	Inverkeithing Harbour depths updated
April 2020	Grange Dock Rosyth North Wall Newhaven Harbour and approaches

GRANGEMOUTH - RULING DEPTHS AND UNDER KEEL CLEARANCE

Data is based on a broad interpretation of current surveys and is only intended as a general guide.

Original surveys should always be consulted especially for detailed operational planning.

The following Ruling Depths apply to the berths, ports and approach channels. The depths indicated are the least depth in the channel or on the berth. Deeper water may be available in certain parts of the channel and conversely shallower water may exist just outside of the channel.

The depths given below are an indication of the least depth, which maybe encountered in the channel, however a close examination of the latest soundings should be made when preparing a passage plan.

For areas not included in the tables below an under keel clearance of 10% of the vessels maximum draft with a minimum under keel clearance of 0.5m should be used.

1. Average Grangemouth Dock Density: **1020**
2. Maximum Ship size normally accepted at Grangemouth: **187m * 27.4m.**
3. All berths in Grange and Carron Dock – average height of quay above waterline **1.0m**
4. Outreach of #4 & #5 transporter cranes **34.5m**, height from quay to gantry **30m.**

Grangemouth Lock Dimensions

	Overall length	Chamber Length	Max LOA	Width between fenders
Outer	108m	90m	82m	29.1m
Inner	129.6m	112m	104m	
Full	237.6m		187m	

Grangemouth Berth Dimensions

Berth	Length	Remarks
North Grange 1 - 2	170m	
North Grange 3 - 7	440m	Distance between #7 and #8 is 84m
Tongue N Grange 8 - 11	365m	
Tongue S Grange 12 - 15	365m	
South Grange	630m	
East Wall	215m	
East Cut Width	36m	
West Cut Width	18.3m	
Carron Dry Dock	105m x 16m	Cill 4.8m

3. All Depths quoted are in metres.

Rosyth

Rosyth Key Information

- Height of quayside above CD is 7.522m
- Maximum length normally accepted at the North Wall is 250m. Vessels out with these dimensions, and for all other berths, will be dealt with on a case-by-case basis.
- Mean spring tide range is 5.0m and neap tide range 2.5m.
- Rosyth traffic is subject to aircraft restrictions due to the Forth Bridges. Ref: Marine Procedure, Guidelines and Information section 1.1
- North Wall strengthened quay 200-400m marks – operating area for the Liebherr crane

Caution: this table is a general summary only. Original sounding surveys are to be consulted for navigation and passage planning.

Berth	Length	Remarks
North Wall	540m	450m fendered at 15m intervals from the west end. White rectangle painted at 530m mark.
T Berth	220m	Ferry berth with Links-span 143m of quayside ahead of the linkspan Fixed Fenders – Protrude 3.7m to seaward and 2m above quayside.
S	160m	Requires fenders
R	170m	Leased to FCBC Forth Replacement Crossing.
Q	150m	
P	150m	
O	170m

Burntisland

Burntisland Key Information

- Entrance to harbour between breakwaters is 76m wide.
- Maximum size ship normally accepted at the East Dock 100m x 16m. Vessels out with these dimensions will be dealt with on a case-by-case basis.
- Maximum size ship normally accepted at the West dock 100m x 27m.
- Mean spring tide range is 4.7m and neap tide range 2.3m.
- **An estimated water loss of up to 1m per tide can be experienced in the East dock while the West dock can lose up to 0.5m per tide.**
- **West dock based on an impounded dock height of 4.48m**

Berth	Width	Remarks
Entrance to East Dock	18.2m	Sill height 3.09m below CD – mitre gate.
Entrance to West Dock	29.5m	Sill height 0.81m below CD – folding gate

Caution: this table is a general summary only. Original sounding surveys are to be consulted for navigation and passage planning.

Location	UKC	RD	Remarks	Reference Chart (Name and date of last survey)

Methil Energy Park

Methil Energy Park Key Information

- Berths owned by Scottish Enterprise
- Maximum sized barges/vessels dictated by draft & mooring analysis carried out by tenant

For further information, please refer to latest edition of Energy Park Fife Quayside Regulations.

Berth	Length	Remarks
East Quay 1	184m	Mooring dolphins & offshore mooring buoys used
West Quay 2	160m	

Caution: this table is a general summary only. Original sounding surveys are to be consulted for navigation and passage planning.

Location	UKC	RD	Remarks	Reference Chart (Name and date of last survey)
Methil (Energy Park Fife)	0.5m			Methil BiFab – 07.08.18
East Berth (Quay 1) 0 to 55m 55 – 80m	0.5m	3.9m 4.5m	With stand-off fendering. Distance given from northern end of East Berth Quay 1.	
West Berth (Quay 2) 0 to 135m 135 to 180m	0.5m	3.8m 2.0m	With stand-off fendering. Distance given from corner of Quay 1 and Quay 2. A patch of 3.4m exists 25m off the berth at the 30m mark.	

Kirkcaldy

Kirkcaldy Key Information

- Main entrance is 15.2 wide.
- Maximum size vessel normally accepted is 85m x 14m. Vessels outwith these dimensions will be dealt with on a case by case basis.
- Port Side is the preferred side alongside at Carrs Milling.
- The berth is a NAABSA Berth (Not Always Afloat but Safely Aground).
- Pilot will board HW-1.
- Lock gates are no longer in use.
- Sill height 0.65m below Chart datum.

Berth	Length	Remarks
NE Berth	Max Vessel 85m	

Caution: this table is a general summary only. Original sounding surveys are to be consulted for navigation and passage planning.

Location	UKC	RD	Remarks	Reference Chart (Name and date of last survey)
Kirkcaldy				Kirkcaldy Harbour – 16.02.19
Approaches	0.7 *	-0.0m	Area subject to siltation – latest sounding chart to be consulted.	
Inner Harbour	0.4m*	-0.3m		
NE Berth	0.4m*	0.5m	NAABSA Berth – PST preferred alongside.	

* Vessels usually take bottom and stated to be “Not Always Afloat But Safe Aground” (NAABSA) by the berth operators – stated UKC are for berthing operations

Inverkeithing

Inverkeithing Key Information

- Berths in Inverkeithing are managed by either RM Recycling or Forth Bridge Stevedoring Limited.
- Max sized vessels accepted at Stone Berth LOA = 110m.
- All berths designated NAABSA by berth operators.
- All arrivals and sailing are calculated using Leith HW-1 hour, subject to vessels draft. If 2 ships on the tide consult HW -2

Berth	Length	Remarks
Deepwater Berth	130m	NAABSA – max vessel length 110m
No 1 Berth	140m	NAABSA
No 2 + No 3 Berths		Berths not used for commercial traffic
Stone Berth	30m	Max LOA 110m
Old Sea Plane Berth		Berth not used for commercial traffic
East Ness Berth	20m	NAABSA, max vessel LOA = 100m
Preston Hill Quay		Berth not used for commercial traffic

Caution: this table is a general summary only. Original sounding surveys are to be consulted for navigation and passage planning.

Location	UKC	RD	Remarks	Reference Chart (Name and date of last survey)
Inverkeithing Approaches	0.5m	0.4m		Inverkeithing Approach – 20.11.19
Inverkeithing				Inverkeithing Harbour – 21.01.20
Deep Water Berth	* 0.3m	1.0m	Restricted to 0.4m owing to approaches: consult sounding chart for depths alongside berth. Vessels ≤80m with a bowthruster may berth PST otherwise SST. To go in MG & PI doc	
No 1	*0.3m	-2.0m	Shoals 20m north of berth, UKC sailing = 0.1m.	
Stone Berth	*0.3m	0.2m	PST preferred. 0.1m on approach to berth, consult chart for depths.	
East Ness Berth	*0.3m	-0.2m	Maximum LOA 100m.	
* Vessels usually take bottom and stated to be “Not Always Afloat But Safe Aground” (NAABSA) by the berth operators – stated UKC are for berthing operations				

Hound Point
